

Umberto Calò

Network, Data Center and Automation Engineer

Network Engineer with 7 years of experience delivering enterprise networking, data center, cloud and automation solutions across large-scale customer environments.

umbertocalo09@gmail.com · [Milan, Italy](#) · [linkedin](#) · [github](#)

PROFESSIONAL EXPERIENCE

NTT Data

Milan

Senior Associate Systems Integration Specialist

2025 - Present

- Contributing to the design and delivery of enterprise networking, data center, cloud and automation solutions for strategic customers, from assessment through implementation and operational handover.
- Working on large-scale data center transformation initiatives, including enterprise data center migrations and greenfield Disaster Recovery infrastructure design.
- Taking part in network automation initiatives, developing Python-based solutions integrating CMDBs, configuration management, compliance validation and monitoring.

L2 Technical Services Implementation Engineer

2022 - 2025

- Delivered design, implementation and operational support for enterprise networking, data center and cloud infrastructures.
- Specialized in compute, storage, virtualization and cloud technologies, supporting a major customer's cloud transformation across Azure, GCP and AWS.
- Led end-to-end delivery of a Cisco Meraki SD-WAN rollout across ~50 retail sites.

L1 Technical Services Implementation Engineer

2019 - 2022

- Supported deployment, configuration, testing and acceptance of enterprise networking and data center infrastructures across a wide range of customer environments, from single-device installations to multi-day infrastructure upgrades.

PROJECTS

Greenfield Disaster Recovery Data Center Design

2026

Leading Defense Industry Company – Data Center Engineer

Comprehensive assessment of the customer's primary data centers to design a new greenfield Disaster Recovery infrastructure, including compute, storage, virtualization, network fabric, SAN and DR workflows.

Cisco UCS Cisco MDS Cisco ACI Cisco Nexus Dashboard Orchestrator HPE Synergy
Dell PowerEdge Dell Unity Dell PowerStore Dell VPLEX Pure Storage VMware ESXi
VMware vCenter Fibre Channel SAN Zoning Zerto

Enterprise Data Center Assessment & Migration

2025

Leading Transportation Company – Data Center Engineer

Assessment and migration planning of one of the customer's primary data centers, analyzing existing architecture, technology stack, dependencies and operational workflows.

Cisco UCS Cisco MDS HPE Synergy HPE Alletra Pure Storage FlashArray Dell Unity
Dell VxBlock VMware ESXi VMware vCenter Fibre Channel SAN Zoning

Network Automation Platform & NetDevOps Enablement

2025

Enterprise Manufacturing & Retail Company – Network Automation Engineer

Designed and implemented a custom automation platform: containerized environment with segregated NetBox instances, Git-based automation with Gitea and Jenkins, and a custom KPI dashboard behind Traefik.

Python Docker Docker Compose NetBox Gitea Jenkins Traefik Cisco Meraki API

Cisco Meraki Infrastructure KPI Tracking Platform

2024

Enterprise Manufacturing & Retail Company – Network Automation Engineer

Custom monitoring and reporting solution to collect and visualize KPIs across multiple Cisco Meraki organizations: device inventory, licensing, connected clients, guest users and bandwidth utilization.

Python REST APIs Cisco Meraki Dashboard API Data Processing Visualization

Enterprise Campus Transformation & Catalyst Center Adoption

2023

Leading Media & Entertainment Company – Network Engineer (Staff Augmentation)

Supported campus transformation initiatives: ThousandEyes for application visibility, migration of Catalyst Center from single-node to a three-node HA cluster, and SD-Access design/PoC activities.

Campus Networking

Enterprise Cloud Transformation & SD-WAN Delivery

2022

Leading Oil & Gas Company – Network Engineer (Staff Augmentation)

Contributed to enterprise network and cloud architectures across Azure, AWS and GCP with Terraform and GitLab. Led the transition of a Cisco Meraki SD-WAN solution from PoC to production for ~25 remote locations.

UEFA EURO 2020 — Stadium Network Operations

2021

UEFA – Network Implementation & Operations Engineer

Contributed to implementation, validation and operational support of the network infrastructure at the Rome Olympic Stadium, ensuring service availability during live match broadcasts.
